DIRECTIONS:

In order to avoid streaking and to obtain best results, never wash the automotive surfaces when they are very hot, or in direct sunlight on hot days. Always spray hot surfaces with water to cool them before applying the shampoo.

When hand washing, it is also important that you always WASH SURFACES FROM THE BOTTOM UPWARDS. Begin at the lower part to be cleaned and as the dirt and soil are loosened, rinse away with clean water. By working this way, streaking will be avoided. Keep the entire car wet as you are working. Give a final rinse just before drying off.

For normal dirty surfaces, 1 oz. (29 mL) to 2 oz. (58 mL) of **United 12** per one gallon (4 L) of water will be completely satisfactory. Place the **United 12** in the container, fill with water, using full pressure to obtain maximum suds. Heavily soiled vehicles may require more concentrated cleaning solutions. After washing, towel dry vehicle.

When using hose end applicators, use 1 part of **United 12** to 2 parts of water in the applicator bottle.

United 12

Reflecting Car Shampoo Concentrate

KEEP OUT OF REACH OF CHILDREN.

CAUTION

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

PRECAUCION AL USUARIO:

Si usted no puede leer Ingles, pregunte a alguien que le traduzca esta etiqueta para usted antes de uso.
