RED-W Water Condensate Gel Tabs are specially formulated to provide up to 6 months of effective protection for A/C condensate drains and pans. The continuous, slow-release action cleans and prevents bio-film from forming in drain pans, while eliminating foul musty odors.

The gel tabs lock into place when activated by condensate moisture, so they stay put and do not block drains. When **RED-W** completely disappears from your drain pan, you know it is time to replace. It leaves nothing to remove or throw away.

One gel tab treats units up to 15 tons for 6 months. Approved for computer rooms.

DIRECTIONS:

For systems up to 15 tons, place one **RED-W** gel tab in condensate pan, positioning it so condensing moisture drips onto, or runs over it. This locks the gel tab in place and begins to release its slow-release actives for effective cleaning performance. For larger systems use additional gel tabs.
