United 489

FRESH AIR™ Air Freshener Gel is designed for use with United's A489 Aromatherapy Mini Spa.

Formulated with Fresh Air™ Technology, this product will refresh the surrounding area with the aromatherapy benefits of peppermint. Peppermint oil has long been used to temporarily relieve respiratory problems, headaches, stress and fatigue, and to increase alertness. As it works to deodorize and refresh the air, this product also works to repel flies and fruit flies from the immediate area.

Each gel cup deodorizes for approximately 30 days. Simply remove the lid from the canister and place the gel cup inside the A489 Aromatherapy Mini Spa to start enjoying the benefits. It's perfect for reception areas, clinics, offices, class rooms, lunch rooms and conference rooms – anywhere a little aromatherapy will benefit the occupants.
