LABORATORIES

BIO BRIGADE DRAIN MEMBRANE is a natural, bio-based formulation made from food grade ingredients. It is specially formulated to control odors that develop in dialysis treatment drains, as well as the drain and fruit flies that like to feed and breed in those drains.

This product features United's Fresh Air Technology™ and can actually work to improve the air near its use, with the proven benefits of peppermint oil. Peppermint oil has long been used to provide relief of respiratory problems and the fragrance is refreshing. According to the definition established by the Association of Occupational and Environmental Clinicians, this formulation is asthmagen-free.

United 247 BIO BRIGADE DRAIN MEMBRANE:

- Earth Smart® Certified
 - Bio-based
 - VOC-free
 - Asthmagen-free
- Safer in use for people, animals and the environment, yet the formulation works quickly to control drain flies and odors.

DIRECTIONS FOR USE:

This product is designed to be used in conjunction with United 248 BIO BRIGADE DEVOUR-DX to treat drains utilized in dialysis treatment. Treat each drain affected at the end of each working day.

After the final disinfecting and cleaning routine performed on dialysis equipment feeding into the drain, allow 15 minutes before treating the drain with United 248 and **United 247**. After 15 minutes has passed, flush drain with clean water. Then pour in 4 ounces of United 248 to keep drains running freely.

Once United 248 has been fed into drains, pour 4 ounces of **United 247 BIO BRIGADE DRAIN MEMBRANE** into the drain. The product will float on the top, creating a membrane-like cap to control odors, while also working to eliminate any drain flies that feed in the drain.
