BIO BRIGADE

BIO BRIGADE DEVOUR-DX is a blend of specific microbes selected for their ability to biodegrade high volumes of grease, proteins, long-chain fatty acids and bio-film that can build-up in dialysis treatment floor drains. It contains patented gram-positive bacterial strains and promicrobials which are capable of fast degradation of Fats, Oils and Grease (FOG). Regular use will reduce blockages and odors significantly.

United 248 BIO BRIGADE DEVOUR-DX:

- Earth Smart® Certified
- Bio-based
- VOC-free
- pH range from 4.5 to 9.8
- Effective temperature range of 38° – 145°F
- Optimal temperature range of 60° – 90°F

DIRECTIONS FOR USE:

This product is designed to be used in conjunction with United 247 BIO BRIGADE DRAIN MEMBRANE to treat drains utilized in dialysis treatment. Treat each drain affected at the end of each working day.

After the final disinfecting and cleaning routine performed on dialysis equipment feeding into the drain, allow 15 minutes before treating the drain with **United 248** and United 247. After 15 minutes has passed, flush drain with clean water. Then pour in 4 ounces of **United 248** to keep drains running freely and begin controlling odors.

Once **United 248** has been fed into drains, pour 4 ounces of United 247 BIO BRIGADE DRAIN MEMBRANE into the drain. United 247 will float on the top, creating a membrane-like cap to control odors, while also working to eliminate any drain flies that feed in the drain.

DEVOUR-DX

KEEP OUT OF REACH OF CHILDREN.

CAUTION

SEE SIDE PANEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

PRECAUCION AL USUARIO:

Si usted no puede leer Ingles, pregunte a alguien que le traduzca esta etiqueta para usted antes de uso.
