LABORATORIES

Regular drain system maintenance with **United 510 PIPELINE** will eliminate build-up and odors throughout the plumbing system and minimize the opportunities for clogs to form. Ideal for use in floor drains, grease traps, showers, kitchens, slop sinks, bar drains and laundry drains. **PIPELINE** is water-activated, therefore it is not recommended for use in dry drains.

The enzymes trigger natural bacteria action — consuming organic waste. **PIPELINE** even breaks down the tough, saponified grease that forms a hard cap in grease traps and lines.

DRAIN SYSTEM MAINTENANCE USE INSTRUCTIONS:

For optimum effectiveness, **PIPELINE** must be regularly injected into the drain system. It may be added manually or automatically using a Peristaltic Metering Pump.

Every drain and fixture in your facility should be treated with **PIPELINE** using the following guidelines:

Area	Daily Treatment For First Week	Twice-A-Week Treatment For Ongoing Use
Sinks	4 oz (120 mL)	2 oz (60 mL)
Floor Drains	4 oz (120 mL)	2 oz (60 mL)

Laundry drains should have lint catchers — especially if the drain is on a septic system.
