IMPACT Granules Living Bacteria

NON-ACID • NON-CAUSTIC • NON-TOXIC

UNITED 55

KEEP OUT OF REACH OF CHILDREN.

CAUTION

SEE SIDE PANEL FOR ADDITIONAL
PRECAUTIONARY STATEMENTS.

NET CONTENTS:

4-OZ. Water Soluble Packets

SALMONELLA-FREE

Digests All Forms of Organic Waste
Through Enzymatic and Bacterial Action.
Reduces Biochemical Oxygen Demand
(BOD), Odors and Suspended Solids in
Wastewater Treatment Plants.

DESCRIPTION:

UNITED 55 IMPACT Granules contain the natural facultative (aerobic and anaerobic) bacteria necessary to liquify and decompose all types of organic waste.

- ORGANIC DIGESTION BENEFITS ALL SYSTEMS
- CERTIFIED SALMONELLA-FREE
- NON-CAUSTIC — NON-ACID
- NON-TOXIC
- FACULTATIVE *Bacillus subtilis* BACTERIA ADAPT TO AEROBIC AND ANAEROBIC CONDITIONS.

Once the **UNITED 55** bacteria are established in a sanitary system, they will clean and purge the system of all organic debris and continue to keep it clean as long as it is used, thus providing a safe and trouble-free waste disposal system.

DIRECTIONS FOR USE:

INSTITUTIONAL AND INDUSTRIAL: **UNITED 55** should be used in all drains, grease traps, septic tanks, cesspools, etc., to provide clean and odor-free conditions.

DRAINS: Drop one packet of **UNITED 55** into a gallon of warm water and mix as packet dissolves. Pour directly into drains. All drains should be treated with **UNITED 55** once each week.

GREASE TRAPS: For traps of 40 gallons (151 L) or less use 2 packets of **UNITED 55** to each 10 gallons (38 L) capacity. For larger traps use 2 to 4 packets for each 50 gallons (189 L) capacity as an initial purge dose. Water soluble packets may be placed directly in traps or mixed with warm water and poured into the drain closest to the trap.

MAINTENANCE DOSAGE: For larger traps treat with 1 packet, 3 times a week. **UNITED 55** used in conjunction with **UNITED 393** will reduce the frequency of hand cleaning grease traps. **DO NOT** pour **UNITED 55** directly through **UNITED 393** or any solvent in a grease trap.

DAIRY INDUSTRY: Treat the same as **INSTITUTIONAL**, but double amounts shown. Treatment should be made during the period of longest retention.

Always begin treatment of the drains nearest to the final effluent (i.e., the lowest floor of a building and the drains nearest the point where the drain line leaves the building).

CAUTION: Wash hands thoroughly after using and do not inhale dust if packet should open before being placed in water or trap.

EMERGENCY AND FIRST AID PROCEDURES:

EYES: Flush with plenty of water for at least 15 minutes. If irritation persists, call a physician or poison center.

SKIN: Wash with soap and water.

INHALATION: Get victim to fresh air. Apply CPR if needed. Call a physician.

IF SWALLOWED: **DO NOT** induce vomiting. Give plenty of water to wash down material. Should not be harmful in stomach but could cause some discomfort. If upset stomach persists, call a physician or poison center.

An MSDS for this product is available through United's website, www.unitedlabsinc.com, providing 24 hour access. Please read the MSDS carefully and follow all directions when using or handling this product. Never reuse empty containers. Incompatible materials may adversely react.
