

United's Responsible Innovations™ bring you **INSIDE OUT Indoor/Outdoor Mold and Mildew Stain Remover**. Formulated with H Factor™ technology, **INSIDE OUT** is an Earth Smart® product that safely utilizes Hydrogen and Oxygen molecules to improve water solubility and effectively remove stains, while dissolving through scale, mineral deposits and build-up.

APPLICATIONS: Use both indoors and outdoors on hard surfaces like tile, grout, cement, brick and cinderblock walls to remove dirt, build-up and stains left from mold and mildew.

- Revolutionary fizzing formula penetrates and dissolves dirt build-up and stains without bleach and harsh scrubbing.
- Ultra-safe Earth Smart® Certified formula.
- Contains no dyes, no fragrances.
- Clings to vertical surfaces.

DIRECTIONS FOR USE:

- Shake bottle well before spraying.
- Spray **INSIDE OUT** on the surface to be cleaned. Let it remain in contact with surface for as long as possible. Usually 10 to 20 minutes will suffice. You may wish to reapply **INSIDE OUT** during that time to keep surface wet, depending upon conditions.
- Thoroughly rinse surface with water to wash away the dissolved stain and dirt particles.

Tougher build-up may require longer contact time and some agitation with a scrub brush. Always rinse with water. A pressure washer may be best for rinsing from brick and cinder block surfaces.

For larger cleaning jobs, a compression sprayer like the United A037 or A042 will be beneficial for applying the product to the surface being cleaned. Protect plants from over-spray.
