SMART SOLVE® Gelled Graffiti Remover is the green choice for cleaning graffiti. This patented, innovative VOC-free graffiti removing formulation works quickly, while remaining safer in use for both the user and the environment.

SMART SOLVE® is:

- Earth Smart® Certified
- Bio-Based - From Vegetable Extract
- NPE-Free • VOC-Free • Petroleum Distillate Free
- Non-Toxic, Non-Caustic, Non-Corrosive, Non-Acid
- Free of Chlorinated Hydrocarbons

SMART SOLVE® works to break through and remove spray paint, permanent marker, inks, lipstick, nail polish, crayon and more.

DIRECTIONS:

Spray onto marks. Wait 3-10 minutes. Remove with clean cloth. If stubborn, repeat application. If accumulation is heavy, remove with scraper, then re-spray. If extreme stubbornness is encountered, use stiff bristle brush and work into the stain. Spray on again—wipe off again. Use clean brush or cloth.

Removing some paints may require longer contact time. May not be as effective on marks that have been on surface for an extended period of time. Use caution when removing graffiti from a painted surface. Try product in a small, inconspicuous area to make sure paint is not removed along with graffiti.

After area is cleaned with **SMART SOLVE®**, use a clean, damp cloth to wipe away any remaining dirt or product.

Safe for use on any metal surfaces and many other hard, non-porous surfaces. May be used on fiberglass, Plexiglas and many plastic surfaces, but it is recommended to limit contact time to 10 minutes. Do not use on hard, clear polystyrene surfaces. This product may soften or craze certain plastics. If surface compatibility is uncertain, test in a small inconspicuous area before use.
