

SHAKE WELL BEFORE USING

For Treatment of Fire Ants

Seen from above, fire ant mounds appear roughly circular. Visually divide mound into four quadrants and determine mounds' center. Probe insertions and treatment should be made in center of each quadrant with final insertion being in center of mound.

Attach soil injector probe firmly onto can. Holding probe approximately 1 inch above mound, begin spraying and slowly insert probe into mound. Continue spraying for entire mound treatment. To maximize spray distribution, push probe into mound until resistance to further insertion is felt (contact with firm dirt), indicating that probe has reached bottom of mound.

Only one injection site is necessary on a mound 6 inches or less. In a 6-inch or smaller mound, inject for 5 seconds. Treat larger mounds in several injections on the basis of size: 10 seconds total for mounds 6-12 inches in diameter, 15 seconds total for mounds 12-18 inches in diameter, and 20 seconds minimum for mounds 18 inches in diameter. On large mounds, treatment may be extended by 1 to 2 additional seconds in order to insure that aerosol formulation reaches all cavities within the mound or colony. Reexamine the mound after 7 days and retreat if any activity is apparent. Look for new mounds in the immediate vicinity and treat these as well in order to prevent inefficiency from mound migration. For best results, apply in cool weather or in early morning or late evening hours.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Storage: Do not store near heat or open flame. Store in a cool dry area away from children.

Container Disposal: Do not puncture or incinerate!

If empty: Place in trash or offer recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions.

NOTICE: To the extent consistent with applicable law, buyer assumes all risks of use, storage or handling of this product not in strict accordance with directions given herewith.

LABORATORIES

FIRE ANT K.O. Fire Ant Control

United 194

Provides Quick Killing Action And Residual Control

ACTIVE INGREDIENTS:

Tetramethrin	0.20%
Permethin*	0.50%
Piperonyl Butoxide**	1.00%
OTHER INGREDIENTS:	98.30%
	100.00%

*Cis/trans ratio: min. 35%(+/-) cis and max. 65% (+/-) trans.

**[butylcarbyl](6-propylpiperonyl) ether and related compounds

**KEEP OUT OF REACH OF CHILDREN
CAUTION
SEE SIDE PANEL FOR ADDITIONAL
PRECAUTIONARY STATEMENTS**

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions

- Apply this product only as specified on this label.
- For Outdoor Use Only.
- Product can only be applied with a soil injection probe.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.
- Do not make applications during rain.

NET WT. 16 oz. (454 grams)

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear the following:

- Long-sleeved shirt and long pants
- Chemical-Resistant gloves
- Shoes plus socks
- Goggles or Safety Glasses

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

- Users should remove clothing/PPE immediately if pesticide gets inside and after handling this product. Then wash thoroughly and put on clean clothing on.

FIRST AID

If on skin or clothing:

- Take off contaminated clothing.
- Rinse skin immediately with plenty of water for 15-20 minutes.
- Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact Infotrac 1-800-535-5053 for emergency medical treatment information.

Environmental Hazards

This pesticide is extremely toxic to aquatic organisms, including fish and invertebrates and to bees. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean water mark. Do not apply when weather conditions favor drift from treated areas. Drift and run-off from treated areas may be hazardous to aquatic organisms in neighboring areas. Do not contaminate water when disposing of equipment wash waters.

Physical Or Chemical Hazards

Contents under pressure. Do not use or store near heat or open flame. Do not puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting.
